Claims 1-63 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for non-heterocyclic, does not reasonably provide enablement for pyridine inidazole. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to morploline the invention commensurate in scope with these claims. There is insufficient enabling disclosure to support the terms heterocyclyl R.

Claims 1-63 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification does not give any guidance as to how each of the heterocyclic substituted derivatives was prepared. In In re Wands, 8 USPQ2d 1400 (1988), factors to be considered in determining whether a disclosure meets the enablement requirement of 35 U.S.C. § 112, first paragraph, have been described. They are:

1. the nature of the invention,
2. the state of the prior art,
3. the predictability or lack thereof in the art,
4. the amount of direction or guidance present,
5. the presence or absence of working examples,
6. the breadth of the claims,
7. the quantity of experimentation needed, and
8. the level of the skill in the art.

In the instant case, Applicants are claiming heterocyclic substituted alkylene diamine derivatives. Applicants have not disclosed any working examples which would demonstrate, or guide, one skilled in the art as to how the heterocyclic substituted derivatives other than pyrrole or imidazole, in particular N-heterocyclic derivatives, were prepared or obtained. The process of making the heterocyclic substituted derivatives or how the heterocyclic substituted derivatives were obtained is not readily apparent from the specification. The specification must teach how to make the invention. In re Gardner, 166 U.S.P.Q, 138 (1970). In order to practice the claimed invention, one skilled in the art would have speculate how the derivatives were obtained or prepared. Therefore, the instant invention is not enabled. Claims limiting the scope of these terms should overcome this rejection.

No claim is allowed.
